

**Mission Statement of the
Wet Weather Working Group
Source Flow Reduction and Flow Target Subcommittee**
as discussed and adopted by the Subcommittee at the June 25, 2015 meeting

Recognizing the regulatory requirement to achieve water quality standards, the Source Flow Reduction and Flow Target Subcommittee will develop goals and implementation strategies to reduce groundwater infiltration and stormwater inflow to optimize local and regional sewer service. The goals and strategies are intended to be technically achievable, economically affordable, reasonably quantified, and enforceable. The Subcommittee will work to develop regional, consensus-based recommendations for cooperative implementation of the goals and strategies by ALCOSAN Customer Municipalities and Authorities, ALCOSAN, DEP, ACHD, and others.
