11:30 a.m. – 4:00 p.m.

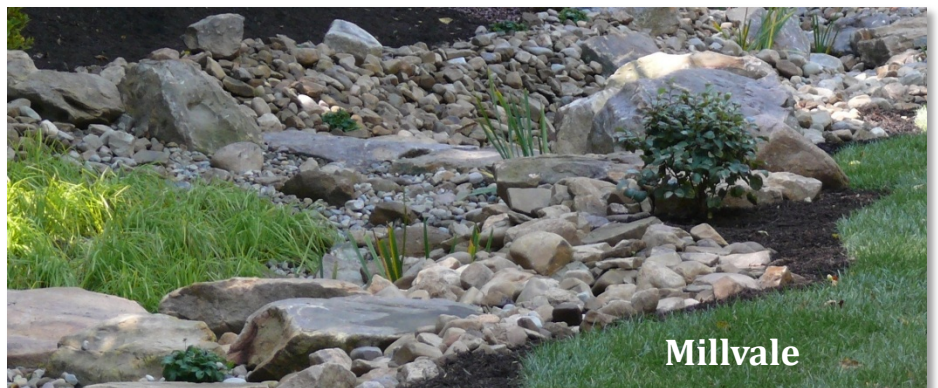

Etna

Join us for a stormwater best management practices bus tour that will include stops in Millvale, West View and Etna to see various examples of installed bioswales, rain gardens, a streetscape, and permeable pavers. Attendees will learn firsthand from our municipal neighbors about their successes and challenges in implementing green infrastructure. This will be invaluable in meeting upcoming requirements to use these technologies for compliance with consent orders and MS4.
